

From 2011 through March of 2018, Betty Burke served as the North American Network Operators' Group (NANOG) Executive Director. Reporting to the Board of Directors, Betty was responsible for all aspects of establishment of NewNOG Inc, and the transition to NANOG as we know it today.

Betty supported NANOG by applying knowledge acquired throughout her 37 years of prior experience in technology, business, and management at various roles with the University of Michigan, Merit Network, and the Michigan Information Technology Center. She provided leadership in the development of strategic and operational plans, and the creation and implementation of marketing campaigns for conference centers and high-tech facilities, including a data center, office building, library and campus fiber assets.

Betty is currently providing transitional support to the new Executive Director and will remain available for consultation on an as-needed basis.
